HIFU

NEW

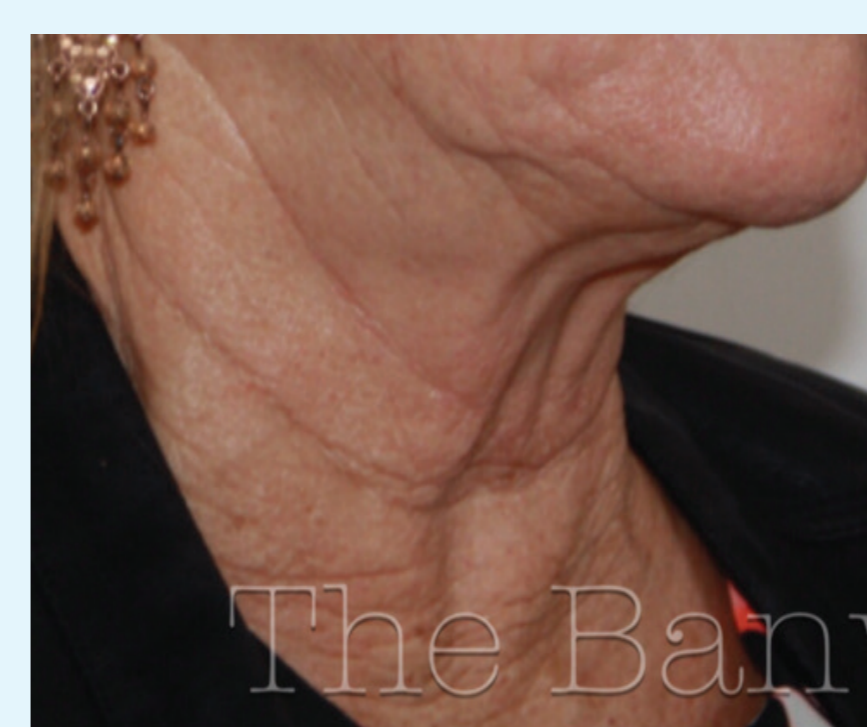

Powerful face & body combination

The latest non-surgical solution for skin lifting & targeted fat reduction using the latest clinically proven HIFU technology to treat both face & body concerns.

WHY 3D-HIFU?

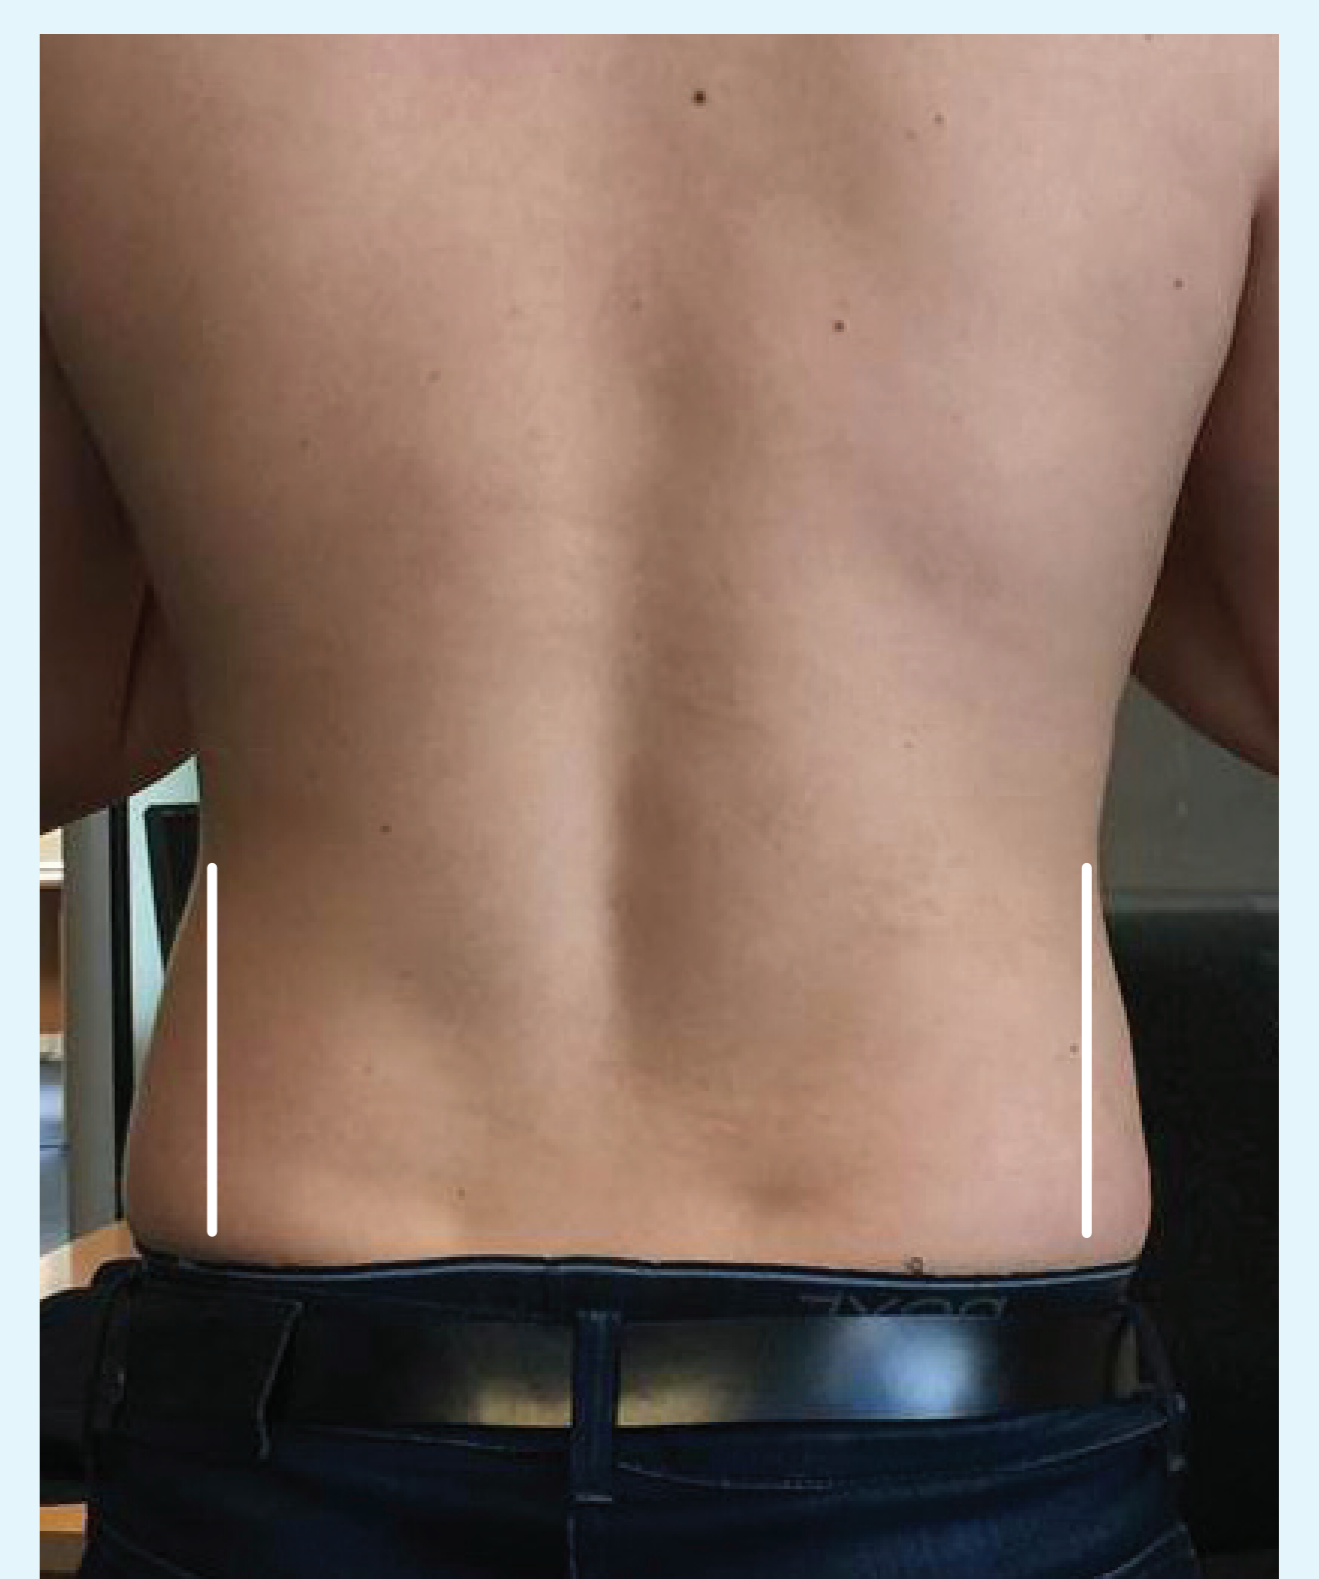

High intensity focussed ultrasound (HIFU) is the latest safe and effective non-surgical technology for the treatment of both facial and body concerns, actively endorsed by renowned UK surgeons as a safe alternative to going under the knife.

TREATED

HIFU FACE

The latest clinically proven technology for non-surgical facial lifting, resulting in an improvement in the appearance of fine lines and wrinkles in just one single session.

Non-Surgical facial lifting has become one of the most sought after treatments and HIFU is the latest to excel in the area after just one single session. It individually targets brow lifting, nasolabial fold reduction, perorbital wrinkle reduction and overall skin tightening and rejuvenation.

HIFU BODY

3D-HIFU Body is the latest non-surgical technology used to target specific, focused areas of fat in the fastest possible treatment time. This treatment is best for pockets of stubborn fat, body sculpting and targeted fat removal.

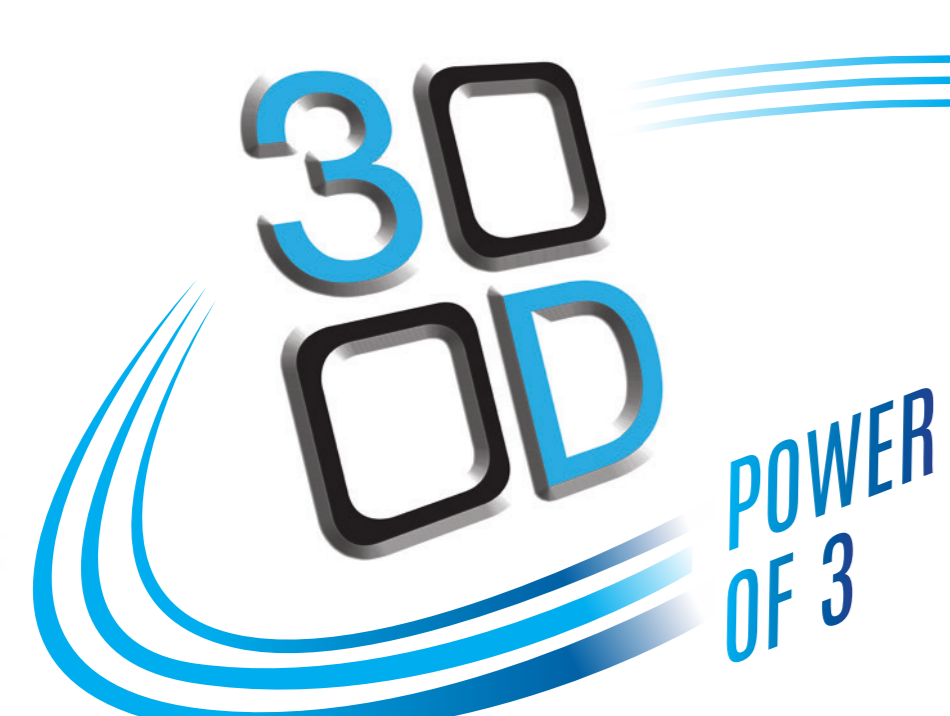

BENEFITS OF 3D-HIFU

- ✓ Safe Alternative to Surgery
- ✓ No Downtime
- ✓ Permanent Results
- ✓ One Off Treatment

"I believe that High Intensity Focused Ultrasound (HIFU) technology represents an exciting advance in non surgical facial rejuvenation"

Paul Banwell FRCS (plast)
Consultant Plastic & Cosmetic Surgeon
